

GLORIA JOSEPH

Portland, OR 97209 | +1 503 347 6270 | josephglory2908@gmail.com

PROFESSIONAL SUMMARY

Data Analytics graduate with hands-on experience using SQL, Python, and Excel to clean, validate, analyze, and report data for business decision-making. More than two years of professional experience translating stakeholder needs into structured reporting workflows, monitoring operational metrics, investigating data discrepancies, and communicating findings across multidisciplinary teams. Brings strong documentation, exploratory analysis, data-quality, and project-management foundations.

CORE QUALIFICATIONS

Analysis & Programming: SQL queries, joins, filtering, aggregations; Python (pandas, NumPy, Matplotlib); exploratory data analysis; statistical methods

Business Analysis: stakeholder needs assessment, reporting and workflow requirements, structured task definition, trend and root-cause analysis

Tools: Power BI, PostgreSQL, Excel, Jupyter Notebook, GitLab, PyCharm, Microsoft Office, AWS cloud fundamentals

Data Quality: validation, reconciliation, completeness and consistency checks, discrepancy investigation, documentation, and escalation

Visualization & Reporting: Power BI, Excel charts and PivotTables, Matplotlib, KPI reporting, audience-focused presentation of findings

Delivery: project-management principles, prioritization, process improvement, cross-functional communication, quality control

PROFESSIONAL EXPERIENCE

Unit Coordinator

2+ Years

Providence - Portland, OR

- Used Excel to manipulate, organize, reconcile, and track high-volume operational data; built and maintained formulas, filters, PivotTables, charts, and structured workbooks for recurring reporting.
- Assessed data quality by reviewing records for missing, inconsistent, or conflicting information; corrected discrepancies or escalated issues while protecting confidentiality.
- Clarified information needs with clinical and operational stakeholders and translated them into structured reporting, tracking, and workflow requirements.
- Analyzed operational metrics to identify trends, exceptions, and follow-up priorities; communicated concise, decision-relevant insights to multidisciplinary stakeholders.
- Supported repeatable and macro-enabled spreadsheet processes, maintaining documentation, consistency, quality controls, and on-time task delivery in a fast-paced environment.

Certified Nursing Assistant - Clinical Decision Unit

2026 - Present

Providence St. Vincent Medical Center - Portland, OR

- Maintain accurate, real-time documentation while following standardized processes, privacy requirements, and quality controls.
- Coordinate with nurses and cross-functional care teams, communicate time-sensitive information, and prioritize concurrent tasks in a stakeholder-facing environment.

EDUCATION

Bachelor of Science, Data Analytics

Graduated Aug 24, 2026

Western Governors University - Salt Lake City, UT

- Coursework and applied practice: statistics, database management, Python, data collection and cleaning, exploratory analysis, visualization, business reporting, critical thinking, and project management.

Bachelor of Science, Animal Sciences

Nov 2018 - Dec 2021

Sokoine University of Agriculture - Morogoro, Tanzania
